Champlain Medical Urgent Care (CMUC) is a locally owned and operated blended practice with primary focus on **Workers Comp** injury case management as well as the full spectrum of **Occupational Medicine** services. The clinic was started and continues to be staffed by husband/wife team **Josh Schwartzberg D.O.** and **Beth Schiller AGNP.**

Our Medical Director "Doc Josh" brings decades of Primary Care as well as Emergency Medicine experience to CMUC and has created a culture of treating patients with respect, unhurried visits and good listening. Our excellent communication and reporting has contributed to our growing list of employer clients which includes City of Burlington, UVM, Global Foundries, Keurig Green Mountain and hundreds of smaller companies, municipalities and Fire/Rescue squads throughout Northern Vermont.

Our services include at home **Sleep Studies** for other area practices. Sleep study reports are supervised by a Board Certified Sleep Medicine Physician and are a fraction of the cost of overnight sleep lab testing. We can usually schedule sleep studies within 1-2 weeks allowing your patients to avoid the long waits at other facilities. We are happy to refer individuals in need of ongoing primary care to other HealthFirst practices accepting new patients.

Our regulated **(UDS) urine drug screening** program is second to none. We have a seamless process for collection and almost always deliver results through a secure portal within 24 hours. Please contact Beth with any questions (beth@champlainmedical.com).

CONTINUED ON PAGE 2

Champlain Medical also offers IME (Impartial Medical Exams) as well as PIR (Permanent Impairment Ratings). Karen Huyck M.D., PhD, FACOEM is our board-certified affiliated occupational medicine physician who has extensive experience in occupational/environmental medicine and also has trained as a disability consultant and utilization reviewer. Appointments can be made without a long delay.

Our staff includes three physicians, two advanced nurse practitioners, one physician assistant, an administrative director, a billing specialist, a referral specialist and four medical assistants. In the last three years the practice has tripled in size thanks to our great reputation and dedicated staff. While **Champlain Medical Urgent Care** is primarily a workplace medicine clinic, we also provide quality services for Urgent Care, DOT, Immigration Physicals and FAA Flight Physicals.

Champlain Medical Urgent Care believes patient care comes first, our appointments are not rushed, we customize care for all of our clients and our employees truly love helping our patients. We have never been interested in corporate, franchise or cookie cutter medicine and that shows in our attention to detail. Testimonials can be found at <https://www.champlainmedical.com/testimonials> and, as always, please contact Kelly with any questions (kelly@champlainmedical.com).
