

Need an IT support provider in Vermont that understands healthcare organizations?

Optimize IT infrastructure, improve operational efficiency, and stay compliant—cost-effectively.

As a healthcare organization, you're under tremendous pressure to increase the quality of care you provide to patients; to keep the data that you gather and store safe; and to enable staff with the technology they need to effectively do their jobs.

At the same time, administrators must manage finances and control costs even when payments for the same services fluctuate.

Having a reliable technology foundation supported by cybersecurity best practices ensures you can improve patient care, avoid devastating cyberattacks, and eliminate downtime.

DEEP EXPERIENCE WITH HEALTHCARE ORGANIZATIONS

30 years of experience serving the IT needs of healthcare organizations—with expertise in HIPAA and PIPEDA compliance, support for EMR, and knowledge about specialized healthcare applications.

24/7 SUPPORT AND A TRUSTED, LOCAL PRESENCE

We are dedicated to providing 24/7/365 IT support no matter your location. With engineers located across North America, VC3 is there for your organization no matter the time of day or type of request. We're always available—just like you.

FAST RESOLUTION TIME

We understand that downtime is unacceptable, and technology should not be a barrier when caring for patients. Our average minutes to resolution is 45 minutes, which minimizes disruption.

MANAGE

Get 24/7 support, eliminate disruptions, and keep IT costs manageable.

PROTECT

Defend your practice from ransomware and data breaches while complying with HIPAA and PIPEDA.

ACCELERATE

Tackle projects that help you integrate specialized IT solutions with patient care services.

"They understand the business and help us make big decisions."

"Their personalized support has resolved multiple IT issues and they understand the business and help make big decisions. They communicate well via a ticketing system, phone, email, and Zoom. The long-term partnership is effective."

-Aaron Mitton, Practice Administrator, Retina Center of Vermont
